This guide was adapted from the Missouri Produce Growers FSMA Record Keeping Guide with permission from the Missouri Department of Agriculture Produce Safety Program and was made possible by FDA grant number 1U2FFD007416. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the FDA.

How to use this Recordkeeping Guide

The goal of the Food Safety Modernization Act (FSMA) Produce Safety Rule (PSR) is to ensure safe produce in the marketplace by preventing microbial contamination. The Montana Department of Agriculture Produce Safety Program is committed to assisting produce growers to develop a proactive approach to food safety on the farm. Along with implementing food safety practices, farms subject to the PSR are required to keep some records. The templates and additional items in this guide have been designed to assist Montana produce growers in meeting the recordkeeping requirements of the PSR. Several of the record templates in this collection were adapted from documents developed by the Produce Safety Alliance and Cornell University.

The records listed in the summary tables (pages 4 & 5) are categorized as “Farm Activity Records” and “Supporting Documentation Records”. Farm activity records include records that the farm completes, such as the annual water distribution system inspection log. Supporting documentation records include records such as well water test results that the farm receives from a water testing laboratory. Not all records listed in the two tables apply to all farms. The column on the left side of the table indicates whether the record is required for most farms, required if applicable, or optional.

There are two copies of each of the following records. The first copy is intended to provide an example of the columns filled in with sample information, and the second copy is a blank template for the farm to photocopy and use. The record header of each template indicates whether the record is required, references the section of the PSR that relates to the record, and specifies the frequency of required documentation for the record. Below each header is a brief explanation of the record, including record retention information.

When completing the records required by the PSR, please keep the following in mind:

- The retention time for most records is two years.
- Each record must be reviewed by an appropriate employee, such as a supervisor.
- Section §112.161 of the PSR requires that records be accurate and legible.
- Upon inspection or request by a regulating agency, a producer must be able to provide the records within 24 hours. Most farms will likely keep their records on-site, but this time frame allows access for farms that may keep records at another location.
- Farms may keep records in a format that is best suited to them (electronic, hard copy, etc.), as long as they meet the PSR requirements.

If you have any questions, please contact the Montana Department of Agriculture Produce Safety Program at 406.444.0131 or foodsafety@mt.gov.

Worker Training Log

PSR Required FSMA PSR reference § 112.30 **Frequency: At Least Annually**

The Produce Safety Rule (PSR) requires that farms covered by the rule establish and keep records of training that document required training of personnel. Training records must include the date of training, topics covered, and the person(s) trained. Training should be conducted as needed but at least annually. Keep this record for at least 2 years.

Farm Name & Address: _____ **Date of Training:** 3/24/19

Name of Trainer: Johnny S Wright **Time of Training:** 10:00 am

Topics Covered in Training: Worker health and hygiene, bathroom facilities, proper and safe harvesting, use of detergent and sanitizers (cleaning and sanitizing activities), inspecting harvest containers and equipment, principles of food hygiene and food safety, applying soil amendments of animal origin

Please attach any training materials used. Attach additional sheets if needed.

Common Produce Safety Rule Acronyms

- BSAAO – Biological Soil Amendments of Animal Origin
- CFU – Colony Forming Units
- FSMA – Food Safety Modernization Act
- PSR – Produce Safety Rule
- SOP – Standard Operating Procedure

Farm Activity Records

(templates provided)

	RECORD TYPE	FREQUENCY	DESCRIPTION
REQUIRED (most farms)	Worker Training	At least annually	As needed, but at least annually, personnel handling covered produce must be trained on food safety as it applies to their assigned duties. Must document topics covered and personnel trained.
	Water Distribution System Inspection	At least annually	As needed, but at least annually, the water distribution system under your control must be inspected for issues that may lead to contamination of water used in irrigation or other covered activities.
	Cleaning & Sanitizing	As necessary	Equipment, containers, and tools used for covered activities (e.g., harvesting, packing, and handling) of covered produce must be cleaned and sanitized as frequently as reasonably necessary. Non-food contact surfaces of equipment and tools must be cleaned as necessary. Record of these activities must be kept. Farms should keep a copy of the label of sanitizer that is used.
REQUIRED IF APPLICABLE (some farms)	Water Treatment Monitoring	As necessary	Covered farms must document results of water treatment monitoring outlined in Subpart E (Water) of the PSR.
	Agriculture Water Die-off Corrective Action	As necessary	Covered farms using microbial die-off or removal rates on covered produce prior to harvest must document actions taken in accordance with §112.45 of the PSR.
	Qualified Exemption Review	At least annually	Farms claiming a qualified exemption must complete an annual review of farm sales to ensure they meet the requirements for qualified exemption. Documentation of this review is required.
	Commercial Processing Exemption – Farm Disclosure Statement	With each shipment	Covered farms claiming a commercial processing exemption on applicable produce must provide the required disclosure statement that accompanies (e.g., bill of lading, invoice, etc.) the produce shipment. A record of the disclosure statement must be kept.
	Commercial Processing Exemption – Buyer Written Assurance	At least annually	Covered farms claiming a commercial processing exemption on applicable produce must receive an annual written assurance from the buyer in accordance with Subpart A (General Provisions) of the PSR.
	Compost Treatment	As necessary	Covered farms that produce treated biological soil amendments of animal origin must keep records to demonstrate the applicable process controls were met (e.g., time, temperature, etc.) in accordance with Subpart F (Soil Amendments) of the PSR.
OPTIONAL (not required by PSR)	Illness and Injury	As necessary	Covered farms may choose to record injury and illnesses of employees to better document potential sources of contamination.
	Restroom Monitoring & Cleaning	As necessary	Covered farms may choose to record restroom monitoring and cleaning activities to ensure restrooms are properly cleaned, maintained, and stocked.
	Rodent & Pest Monitoring	As necessary	Covered farms may choose to record rodent and pest monitoring activities to better manage rodent and pest control. Covered farms must take appropriate steps to ensure pests and rodents don't contaminate produce.
	Soil Amendment Application	As necessary	Covered farms may choose to record when they apply soil amendments to covered produce to ensure proper application and time intervals are met.
	Visitor Log	As necessary	Covered farms may choose to record visitors that are at the farm. Covered farms must inform visitors of farm policies and procedures.
	Wildlife & Domestic Animal Monitoring	As necessary	Covered farms must take actions reasonably necessary to ensure that wildlife and domesticated animals do not contaminate covered produce. Records are not required but may assist farms in managing animal activity.
	Worker Training Checklist	As necessary	Covered farms are required to document annual training of workers who conduct covered activities. This checklist provides a list of key training topics to be addressed during the annual training. The checklist is not comprehensive and should include topics specific to your farm operation.

Applicability of the above records depends on the farm's operations. "Covered farms" refers to farms covered by the Produce Safety Rule as defined in Subpart A (General Provisions) of the Produce Safety Rule. Please see the Produce Safety Rule for full details regarding recordkeeping requirements.

This publication was made possible by FDA grant number 1U2FFD007416. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the FDA.

Supporting Documentation Records

	RECORD TYPE	FREQUENCY	DESCRIPTION
REQUIRED IF APPLICABLE (some farms)	Qualified Exemption Sales Records	As necessary	Farms claiming a qualified exemption must keep records (i.e., receipts, sales records) demonstrating the farm meets the eligibility requirements for a qualified exemption. Records the farm relies on for the 3-year period prior to the applicable calendar year must be kept.
	Water Test (Surface Water)	At least five (5) times annually	Covered farms with surface water (ponds, streams, etc.) subject to §112.44 of the PSR must be tested and documented at least five times annually after the initial water quality profile is established. Untreated surface water may not be used to wash hands or to clean food contact surfaces. Any water (surface, ground, etc.) used for growing activities of covered produce must have a Geometric Mean (GM) of 126 or less colony forming units (CFU) of generic <i>Escherichia coli</i> per 100 mL of water and a Statistical Threshold Value (STV) of 410 or less CFU of generic <i>E. coli</i> per 100 mL of water. Corrective actions outlined in the PSR may be used to meet these values.
	Water Test (Ground Water)	At least annually	Covered farms with ground water (wells) subject to §112.44 of the PSR must be tested and documented at least once annually after the initial water quality profile is established. Water used for washing hands, to clean food contact surfaces, and for use in harvest and post-harvest activities must have no detectable generic <i>Escherichia coli</i> (<i>E. coli</i>) in 100 milliliters.
	Water Test (Public water)	At least annually	Covered farms using water from a public water system must annually obtain certificates of compliance or documentation of water test results.
	Microbial Die-off Method – scientific data or information	As necessary	Covered farms using microbial die-off or removal rates on covered produce post-harvest, in accordance with §112.45(b)(1)(ii) of the PSR, must keep scientific data or information used to support die-off or removal rates.
	Water Treatment Method – scientific data or information	As necessary	Covered farms treating water in accordance with Subpart E (Water) of the PSR must keep documentation of scientific data or information used to support the adequacy of the water treatment method used.
	Alternative Water Treatment	As necessary	Covered farms that establish and use alternatives in accordance with §112.49 of the PSR must keep scientific data or information to support the alternative.
	Alternative Analytical Methods	As necessary	Covered farms must document any analytical methods for water quality testing used in lieu of the method that is outlined in §112.151(a) of the PSR.
	Third Party Compost Treatment & Handling	As necessary	Farms using treated biological soil amendments of animal origin from a third party must keep documentation (e.g., Certificate of Conformance) that the amendment was adequately treated with appropriate process monitoring and handling from the third party.

Applicability of the above records depends on the farm's operations. "Covered farms" refers to farms covered by the Produce Safety Rule as defined in Subpart A (General Provisions) of the Produce Safety Rule. Please see the Produce Safety Rule for full details regarding recordkeeping requirements.

Water Distribution System Inspection Log

PSR Required

FSMA PSR reference § 112.50

Frequency: At least annually

The Produce Safety Rule (PSR) requires that farms covered by the rule inspect all agricultural water systems that are under the control of the farmer (including water sources, water distribution systems, facilities, and equipment), to identify conditions that are reasonably likely to introduce known or reasonably foreseeable hazards into or onto covered produce or food contact surfaces. See the Produce Safety Rule for full details on this inspection requirement. Keep this record 2 years past the date it was created. Farms will need to also consider the following:

- Nature of each water source (well, surface water, public water)
- Extent of control over each water source
- The degree of protection of each water sources used (e.g., barriers, fences, well houses, etc.)
- Use of adjacent and nearby land (e.g., animal operations, run off, etc.)
- Use of water prior to your farm (e.g., do other growers use water source prior to your farm?)

Farm Name & Address: *High Hill Produce 1845 S. Ridge Rd. Red Lodge, MT 59068* **Date of Inspection:** *4/22/2022*

Please refer to Subpart E of the Produce Safety Rule and your farm standard operating procedures for specifics on water distribution system inspections. PLEASE ATTACH ADDITIONAL SHEETS IF REQUIRED.

Date	Time	Water Distribution System and/or Water Source	Observation	Corrective Actions Taken (if required)	Initials
4/22/22	7 AM	Well 1, north field	Well casing in good shape, backflow prevention device in place, no broken pipes. Well water tested annually (record kept on farm).	None.	JSW
4/22/22	9 AM	Pond, south field	Significant geese presence around the south field pond.	Introduce decoys 4/23. Will monitor weekly and test water as necessary.	JSW
4/22/22	9:30 AM	Pond, south field	Cattle field located downhill from south pond. No runoff into the pond. Fence surrounds south field pond.	Will monitor animal fencing weekly.	JSW
4/22/22	11 AM	Pond, south field and well 1 north field	Pond used for produce drip irrigation (under plastic) and well for overhead irrigation are under control and accessible to supervisor.	None.	JSW
4/22/22	12 PM	Public Water	Obtained certificate of compliance from public water system. Public water used for harvest, cleaning and post-harvest activities.	Will obtain certificate of compliance annually. Will ensure no cross connections from untreated water made to public water source.	JSW

Cleaning & Sanitizing Log

PSR Required Record

FSMA PSR Reference § 112.140

Frequency: As necessary

The Produce Safety Rule (PSR) requires that farms covered by the rule must inspect, maintain, clean, and sanitize all food-contact surfaces used during harvesting, packing, and holding of covered produce. Non-food contact surfaces used during covered activities should be maintained and cleaned. Cleaning and sanitizing activities must be completed as frequently as reasonably necessary to protect against contamination of covered produce. Keep this record for at least 2 years.

Farm Name & Address: *High Hill Produce 1845 S. Ridge Rd. Red Lodge, MT 59068* **Month and Year:** *October 2022*

Please refer to the farm's standard operating procedures (SOP) for adequate cleaning and sanitizing practices C = Cleaned S = Sanitized

Date	Time	Surface, Tools, or Equipment	Cleaned (C) and/or Sanitized (S)	Methods Used	Initials
10/11/22	10:07 AM	Harvest tools	C	See Cleaning SOP (Removed dirt with brush, washed with detergent, rinsed, air dried).	PW
10/11/22	10:30 AM	Dump Tank	C & S	See Dump Tank Cleaning & Sanitizing SOP (drained tank, washed with detergent, rinsed, sanitized with food grade bleach). Air dried.	PW
10/11/22	11 AM	Harvest buckets	C & S	Buckets dirty from harvest. Cleaned with brush and detergent. Rinsed, then sanitized with food grade bleach. Air dried (buckets not nested). See farm SOP.	PW
10/18/22	7 AM	Harvest tools	C & S	Harvest tools found on ground. Cleaned with brush and detergent. Rinsed, then sanitized with food grade bleach. Air dried.	AH
10/18/22	8:30 AM	Harvest buckets	C & S	Excessive flies found on buckets. Cleaned with brush and detergent. Rinsed, then sanitized with food grade bleach. Air dried (buckets not nested). See farm SOP.	AH
10/18/22	10 AM	Harvest buckets	C & S	Buckets dirty from harvest. Cleaned with brush and detergent. Rinsed, then sanitized with food grade bleach. Air dried (buckets not nested). See farm SOP.	AH
10/18/22	11 AM	Tomato line belt & brushes	C & S	Cleaned belt and brushes (food contact surface) with detergent. Sanitized with food grade bleach.	AH
10/18/22	11:15 AM	Tomato line sides & frame	C	Cleaned tomato line sides and top frame (non-food contact surface) with detergent.	AH
10/22/22	5 PM	Sorting Table	C & S	Cleaned sorting table with detergent and sanitized with food grade bleach. Completed prior to and after sorting.	PW
10/25/22	8 AM	Box cart	C	Box cart used to transfer produce in boxes cleaned with detergent using a brush and rinsed.	MB
10/25/22	7:15 AM	Farmers market trailer	C	Trailer for transporting produce cleaned with detergent, rinsed, and allowed to dry.	MB

Qualified Exemption Review

PSR Required (if Applicable)

FSMA PSR Reference § 112.7

Frequency: Annual

Farms claiming a qualified exemption from the Produce Safety Rule (PSR) must complete and document an annual review of farm sales to ensure they meet the criteria for a qualified exemption. The documentation of the annual review must be kept for two years. Records (such as receipts or other sales tracking records) for the three years prior to the applicable calendar year to support a qualified exemption must be kept.

Farm Name & Address: *Low Creek Produce 2376 N. Range Rd. Cascade, MT 59421* **Date of Review:** Jan 1, 2022

STEP 1: Review **total food sales** for previous three years. The term “food” means articles used for food or drink for humans or other animals including produce, grain, hay, dairy products, meat, eggs, value added, etc.

Year 1 (Sales Year: 2019) \$ 30,000 Total Food Sales
 Year 2 (Sales Year: 2020) \$ 55,000 Total Food Sales
 Year 3 (Sales Year: 2021) \$ 42,000 Total Food Sales
 Previous 3-Year Average Total Food Sales: \$ 42,333.33 (Part A)

**Total Food Sales Threshold Adjusted for Inflation: \$ 584,908 (Part B) – \$584,908 is the 3-year average for 2019-2021
 ** see information at the bottom of the page

Are the farms 3-year average food sales \$42,333.33 (Part A) less than the Food Sales Threshold Adjusted for Inflation \$584,908 (Part B)? If yes, continue to STEP 2. If no, your farm does not meet the criteria for a qualified exemption.

STEP 2: Review **total food sales** that were sold to qualified end-users (QEU). QEU are consumers of the food (sales directly to customers at a farmers’ market, U-Pick, roadside stand, on-farm store, CSA, other direct customer sales, or sales of food sold to a food retail establishment (grocery store) or restaurant that is in the same state as the farm or within 275 miles of the farm).

	Sales to QEU	Sales to non-QEU
Year 1 (Sales Year: <u>2019</u>)	\$ <u>30,000</u>	\$ <u>0</u>
Year 2 (Sales Year: <u>2020</u>)	\$ <u>40,000</u>	\$ <u>15,000</u>
Year 3 (Sales Year: <u>2021</u>)	\$ <u>42,000</u>	\$ <u>0</u>
3-Year Average:	\$ <u>37,333</u> (Part C)	\$ <u>5,000</u> (Part D)

Comment: food sales from farmers market in 2019 & 2021. \$15,000 of grain sold to a broker at a grain elevator in 2020.

Is the 3-year average of sales to QEU \$37,333 (Part C) greater than the 3-year average of sales to non-QEU \$5,000 (Part D)? If you answered yes in STEP 1 and STEP 2, your farm meets the requirements for a qualified exemption.

****Adjustments for inflation:** Total Food Sales Threshold Adjusted for Inflation is an average of the previous 3-year’s inflation thresholds listed by FDA. Visit FDA’s website at <https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-inflation-adjusted-cut-offs> to view the table of these values. You may also contact the Montana Department of Agriculture Produce Safety Program at 406.444.0131 for assistance in determining the correct value.

Previous 3-Year Average Total Food Sales: \$ _____ (Part A)

Total Food Sales Threshold Adjusted for inflation: \$ _____ (Part B) – see information at the bottom of the page

Are the farms 3-year average food sales _____ (Part A) less than the Food Sales Threshold Adjusted for Inflation _____ (Part B)? If yes, continue to STEP 2. If no, your farm does not meet the criteria for a qualified exemption.

STEP 2: Review **total food sales** that were sold to qualified end-users (QEU). QEU are consumers of the food (sales directly to customers at a farmers’ market, U-Pick, roadside stand, on-farm store, CSA, other direct customer sales, or sales of food sold to a food retail establishment (grocery store) or restaurant in Montana or within 275 miles of the farm).

	Sales to QEU	Sales to non-QEU
Year 1 (Sales Year: _____)	\$ _____	\$ _____
Year 2 (Sales Year: _____)	\$ _____	\$ _____
Year 3 (Sales Year: _____)	\$ _____	\$ _____
3-Year Average:	\$ _____ (Part C)	\$ _____ (Part D)

Comment: _____

Is the 3-year average of sales to QEU _____ (Part C) greater than the 3-year average of sales to non-QEU _____ (Part D)? If you answered yes in STEP 1 and STEP 2, your farm meets the requirements for a qualified exemption.

****Adjustments for inflation:** Total Food Sales Threshold Adjusted for Inflation is an average of the previous 3-year’s inflation thresholds listed by FDA. Visit FDA’s website at <https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-inflation-adjusted-cut-offs> to view the table of these values. You may also contact the Montana Department of Agriculture Produce Safety Program at 406.444.0131 for assistance in determining the correct value.

In accordance with 21 CFR §112.2 of the Food Safety Modernization Act (FSMA) Produce Safety Rule, produce farms seeking a commercial processing exemption for covered produce, must disclose in documents accompanying the produce, in accordance with the practice of the trade, that the food is “**not processed to adequately reduce the presence of microorganisms of public health significance**”. This disclosure statement must be provided by the seller to the buyer and must be provided in documents accompanying the produce. Examples of such documents accompanying the produce may include labels, bills of lading, shipping documents, or other documents that will notify appropriate personnel. (Please note that the farm [seller] must keep a record of all disclosures made. An appropriate record may include a ledger of all shipments with an example disclosure document or copies of the original shipping document containing the disclosure statement).

PROCESSING ASSURANCE STATEMENT

Dear Sue Black,
(*Grower name*)

I certify that all produce intended for commercial processing purchased from Mo's Vineyard (*farm name*) will be processed and/or handled in accordance with the requirements outlined in 21 Code of Federal Regulations 112.2 (b).

I certify that Show-Me Winery (*buyer business name*) has established and is following procedures (listed below) that adequately reduce the presence of microorganisms of public health significance; or that the aforementioned produce will be sold to a subsequent entity in the distribution chain that has agreed in writing to process the produce to adequately reduce the presence of microorganisms of public health significance. Disclosures and annual written assurances that are required when selling the aforementioned produce to a subsequent entity in the distribution chain will be provided and obtained.

Procedure used to process produce: fermentation

Sincerely,

Mike Douglas – Head Vintner

Restroom Monitoring & Cleaning Log

PSR Optional Record

FSMA PSR Reference § 112.129

Frequency: As necessary

The Produce Safety Rule (PSR) requires that farms covered by the rule have toilet facilities designed to prevent contamination of produce, be accessible for servicing, and be serviced and cleaned at a frequency to ensure suitability of use. Toilet facilities must be supplied with toilet paper, must provide sanitary disposal of waste and toilet paper, and be located near an adequate handwashing station. Although not required by the Produce Safety Rule, farms should keep a record of when monitoring and cleaning of toilet facilities occurs.

Worker Training Checklist

The Produce Safety Rule (PSR) requires that employees (including part-time, seasonal, volunteers, & supervisors) who handle (or supervise others who handle) covered produce or food-contact surfaces must be adequately trained as needed, but at least once annually. Training must also be given in a manner that the worker understands. At least one supervisor or responsible party on the farm must complete the standardized Produce Safety Grower training course. It is important to recognize that farms vary greatly in their operation and training topics must cover food safety as it relates to the farm’s specific operations. **Farms must develop a training that is specific and applicable to their operation, which includes the required training topics outlined in the PSR. This table is an aid to help farmers identify key training requirements and should NOT be used as a comprehensive training topic list.**

Applicability	Topic	Description	Completed? (Check box)
Required for ALL Workers (Required for all workers who handle covered produce including those who harvest)	Principles of Food Safety & Food Hygiene		
	Microbial Contamination	Workers must be trained to identify sources and routes that could lead to produce or food contact surfaces becoming contaminated.	
	Cleaning & Sanitizing	Workers must be trained on the difference between cleaning & sanitizing and know the steps to properly conduct these activities.	
	Working Animals & Wildlife	Workers must be trained on the potential risks of microbial contamination caused by wildlife or by working animals.	
	Additional Farm Specific:	Description:	
	Personal Health & Hygiene		
	Recognizing Health Conditions / Sick Policy	Workers must be able to recognize symptoms of health conditions that may lead to contamination of food contact surfaces or produce. Workers must be trained on who to report to in cases of injury or illness.	
	Injury Policy	Workers must know how to properly handle incidents when bodily fluids are present and could potentially contaminate covered produce. Employees should be trained on where to receive or access first aid.	
	Handwashing	Workers must know when and how to properly wash hands. §112.32 of the Produce Safety Rule outlines when handwashing is required.	
	Restroom	Workers need to be made aware of restroom locations and proper restroom hygiene protocols to reduce the potential for cross-contamination.	
	Additional Farm Specific:	Description:	
	Produce Safety Rule Standards		
	Applicable Standards found in the PSR	Workers must understand the standards found in Subparts C (Worker Training) through Subpart O (Records) of the PSR which apply to their job tasks. For example, workers who clean and sanitize the pack line will need to be trained on the requirements of the rule which apply to this activity (i.e., Subpart L – Equipment, tools, buildings, and sanitation). Workers need to understand the terms “covered produce” and “covered activities”.	
	Additional Farm Specific:	Description:	
Required for Harvest Workers	Employees Engaged in Harvest Activities of Covered Produce		
	Proper & Safe Harvest	Workers who conduct harvest activities must be trained to recognize produce that must not be harvested, including produce that has been or is likely to be contaminated. §112.114 of the PSR defines dropped covered produce.	
	Inspecting Harvest Containers and Equipment	Workers who conduct harvest activities must know how to inspect harvest containers and equipment to ensure that they are functioning properly, clean, and maintained to not become a source of contamination of covered produce.	
	Correcting Harvest Containers & Equipment	Workers who conduct harvest activities must know how to correct problems with harvest containers or equipment or know to report such problems to the supervisor, as appropriate to the person's job responsibilities.
